

JANNEKE VAN VELTOM

FULL-STACK DEVELOPER & UI/UX DESIGNER

Zundert, Nederland

info@jannekevanveltom.nl

About me

I am a highly motivated, proactive programmer, result-oriented, function well under pressure and customer-friendly. In addition, I would describe my personality as creative, positive, social, helpful, realistic, honest, energetic and perfectionist.

My level in investigative problem solving is balanced. I think solution-oriented in both IT-related and non-IT-related problems. The use of methods such as Human Centered Design & Double Diamond, ensures an effective approach and a creative solution/concept that fits the (end) user.
